

# Deer Park Vision Plan

**Who:** The Town of Babylon has hired Vision Long Island, who has over 20 years of experience working with communities to shape and plan their future, to engage with the residents and business owners of Deer Park for this process.

**What:** The Deer Park Vision Plan will consist of a study and a series of recommendations, based on community input, to improve the commercial areas of Deer Park. It will identify strategies and funding to implement community recommendations.

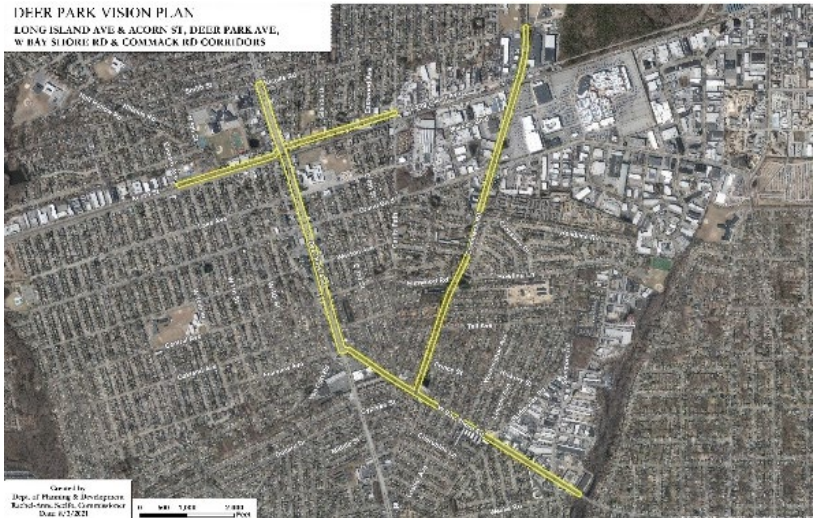

**Where:** Primary focus is along commercial roads within the hamlet of Deer Park including:

- Deer Park Avenue, between Nicolls Road and W Bay Shore Road
- Acorn Street and Long Island Avenue, between Eastern Avenue and Carll's Path
- W Bay Shore Road, between Deer Park Avenue and Weeks Road
- Commack Road, between Nicholls Road and W Bay Shore Road

**When:** Preliminary outreach has begun. Vision has attended and will continue to attend community meetings, chamber of commerce meetings, school district, fire department and other stakeholder meetings, while planning for a general public meeting to be conducted. Additional input will be gathered through an online survey.

**Why:** For many years now, the Deer Park community has expressed its desire for change in infrastructure and physical improvements, economic development, beautification, and Main Street corridor development as a goal. This process will begin to address these issues and provide recommendations to the Town of Babylon as well as strategies for implementation.
